July 29

Dear Mr Weisberg,

My roommate and I wish to thank you for reassuring us that in the incredible mass of dishonesty which is filtered through the newspapers and public communications media, there are still a few people unafraid and unapathetic enough to find and put forth the truth as they see it.

We wish to congratulate you on your conduct and self control on the Alan Burke show. Incidentally who employed those lawyers who seemed to be working together quite frantically to filibuster you, and yet who had not enough interest in the subject to have even read your book?

Our local bookstore is sold out of your book and we intend to vigorously recommend and/or buy copies for as many of our friends as possible and spread at least a ripple of truth in ever widening circles.

We found - and depending on your preconceived ideas on the subject you may or may not resent this -

we found a great similarity in the government's handling of this case to what Frank Edwards, the NICAP organization and John G. Fuller have encountered in their handling of UFO reports from police, air force personnel, radar technicians and other evidence given by highly reliable witnesses. (You might find their books interesting from this angle alone) We are equally distressed over this situation - and indeed, the total implications of the whole dishonesty, conspiracy and disregard for "the public" on the part of the government.

Our best wishes and sincere admiration... There MUST be a public congressional hearing on this Kennedy business ---

Would it be going too far to say that either the government

seems to be covering up an international situation which would cause a clamour in the public for a world war if the facts of the assassination were known, or some plot among themselves? As you say, I suppose you cannot really discuss such speculations responsibly.

Very truly yours,

Rachel J Steinhardt

and

Joan A. Gotti
